

How to modify a course's information

Once you have created a course on systeme.io, you will often need to update its information: change the title, improve the description, update the cover image, modify the instructor details, or adjust branding elements.

Fortunately, editing a course's information is very simple and can be done at any time without affecting enrolled students.

Here is a complete and detailed guide.

1. Go to the Courses section

Log in to your systeme.io account.

In the left menu, click on **Assets**, then select **Courses**.

You will see the full list of all the courses you have created.

2. Open the course settings

Find the course you want to edit.

Click on the three dots (...) that appear next to the course name, then select **Settings**.

The full course settings page will open. This is where you can modify almost every piece of information related to the course.

3. Edit the course information

On the settings page you can update many fields. Here are the most important ones:

Basic information

- **Course title** – the main name of your course
- **Instructor name** – the name that will be displayed to students
- **Language** – the language of the course
- **Description** – a detailed text that explains what the course is about

URL and domain

- You can customize the domain used for the course
- You can also edit the URL path so the course has a clean and professional address

Visual branding & appearance

- **Theme** and **font** – choose the look and feel of the student area
- **Instructor photo** – upload a professional picture of the teacher
- **Logo** – add your brand logo
- **Cover image** – the main image of the course (recommended in 16:9 format)

You can also adjust other advanced options depending on your needs (sales page link, access settings, etc.).

Take your time to review every field and make sure everything is consistent with your current branding and offer.

4. Save your changes

Once you have finished editing, click the **Save** button located in the upper-right corner of the page.

Your changes are applied immediately. Existing students will see the updated information the next time they access the course, and new visitors will also see the new details.

Important notes

- Editing the course information does **not** remove access for students who are already enrolled.
- You can come back and modify the information as many times as you want.
- If you change the cover image or title, make sure it still matches the sales pages and funnels that promote the course (see [How to sell an online course](#)).

You can also edit the instructor information more specifically if needed (name and photo only) from the same settings area.

If you are just starting and still need to create the course, begin with this guide: [How to create a course using systeme.io](#).

Conclusion

Modifying a course's information on [systeme.io](#) is quick and flexible. Whether you want to improve the title, refresh the description, change the cover image, or update branding elements, everything is centralized in the course Settings page.

Keep your course information clear, attractive and up to date — it helps both new visitors and existing students have a better experience.

Take a few minutes regularly to review and improve the presentation of your courses on [systeme.io](#).
