

How to create a course bundle

A course bundle allows you to group several courses into one single package. This is perfect when you want to offer more value, create a higher-ticket product, or give access to a complete learning path. On systeme.io creating a bundle is simple and only takes a few minutes.

Here is the complete step-by-step guide.

1. Go to the Bundles section

Log in to your systeme.io account. In the main menu go to **Assets** → **Courses**, then click on the **Bundles** tab.

2. Create the bundle and fill in the details

Click the **Create** button.

You will be asked to enter:

- Name of the bundle
- Description
- Instructor name

- Cover image

Fill in the information and click **Save**.

3. Add courses to the bundle

Open the bundle you just created. Click **Add a course**, then select the courses you want to include in the package.

You can add as many courses as you like. Once you have selected them, click **Save**.

You can also set a delay before the student can start the content if needed.

4. Your bundle is ready

The course bundle is now created. You can:

- Sell it through a sales funnel
- Give free access (manually or with an opt-in page)
- Use the same access types as regular courses (Full, Drip, Partial...)

Students who receive access to the bundle will see all the courses included in it.

Why use course bundles?

- Increase the average order value
- Create complete learning programs
- Offer more attractive packages
- Simplify access for your students

You can still sell each course individually — creating a bundle does not remove that possibility.

If you haven't created your individual courses yet, start with this guide: [How to create a course using systeme.io](#).

Conclusion

Creating a course bundle on [systeme.io](#) is one of the easiest ways to package your knowledge and increase the value of your offers. In just a few clicks you

can group your courses and start selling a more complete solution to your students.

Build your first bundle today and give your audience a better learning experience.
