

How to create a light course

On systeme.io you can create two types of courses: classic courses and light courses. Light courses are a simpler and faster way to build and sell online courses, especially when you want a clean product page inside a Creator Store.

Here is the complete guide to create a light course.

1. Go to Creator stores

Log in to your systeme.io account.

Go to the **Sites** tab and click **Creator stores**.

Select the store you want to use (or create one if you don't have any yet).

2. Add a new product and choose “Sell a course”

Click **Add new product**.

Select the option **Sell a course**.

Important: Light courses can only be created using the “Sell a course” option inside a Creator Store.

In the Thumbnail tab, customize the header image, title, button text and subtitle of your product page, then continue.

3. Choose Light course and build the content

On the Course tab, select **Light course**.

You can either select an existing course or click **Create a new light course**.

Enter a **Title** and a **Description** for your light course.

Then scroll down to the **Add modules** section:

1. Click **Add module**
2. Name the module and save
3. Click **Add lecture** inside the module
4. Add a title and body text for the lecture
5. Upload a video and/or a file attachment if needed
6. Optionally set a **Delay** (in days) for drip content
7. Click **Save**

Repeat the process for all modules and lectures you want to include.

Once a delay is set, a “Drip” label automatically appears next to the lecture.

Key differences of light courses

- They are created and sold through the Creator Store
- They have a simpler structure and cleaner student experience
- They support modules, lectures, videos, attachments and drip delays
- Some advanced features available in classic courses (such as certain download protections) may not apply to light courses

If you prefer the more advanced classic course builder, you can still use the traditional method: [How to create a course using systeme.io](https://systeme.io).

You can also sell classic courses or light courses inside funnels, or give free access using the usual methods (see [How to grant free access to a course](#) and [How to give free access to a course bundle](#)).

Conclusion

Creating a light course on systeme.io is fast, simple and perfect when you want a clean product page inside your Creator Store. You can add modules, lectures, videos, files and even drip content in just a few minutes.

Use light courses for shorter trainings, mini-courses or any offer where simplicity and speed matter.

Start building your first light course today and sell it directly from your Creator Store on systeme.io.
