

How to edit the course instructor's information

The instructor's name and photo are an important part of the branding of your course. They appear in the student dashboard and help create a more personal and professional learning experience.

On systeme.io you can easily update this information at any time for each course independently.

Here is a clear and complete guide.

1. Open the course settings

Log in to your systeme.io account.

Go to **Assets** → **Courses**.

Find the course you want to edit, click the three dots (...) next to it, and select **Settings**.

The full course settings page will open.

2. Update the instructor name and photo

In the settings page you will find the instructor section.

You can modify two main elements:

- **Instructor name** – type the name you want to display (it can be your real name, a brand name, or a team name)
- **Instructor photo** – upload a professional picture (square format works best)

These two fields are independent for every course, so you can have different instructors (or different photos) for different courses if needed.

You can also update other visual elements at the same time (cover image, logo, theme, etc.) if you wish. For a full overview of all course settings, see [How to modify a course's information](#).

3. Save the changes

Once you have updated the name and/or photo, click the **Save** button in the upper-right corner of the page.

The new instructor information is applied immediately. Students will see the updated name and photo the next time they open the course.

Why it is important to keep instructor information up to date

- It creates trust and a personal connection with your students
- A good photo makes the course look more professional
- You can change the instructor if you have multiple teachers or rebrand the course
- It helps with consistency across your school page and student dashboard

Changing the instructor information does not affect student access, progress, or enrollments. It is purely a visual and branding update.

If you are still building your first course, start with this guide: [How to create a course using Systeme.io](#).

Conclusion

Editing the course instructor's information on systeme.io is very simple. In just a few clicks you can update the name and photo so your course always looks professional and aligned with your brand.

Take a few seconds to review the instructor details of your courses and make sure they represent you (or your team) at their best.

A clear name and a good photo make a big difference in the overall student experience on systeme.io.
