

How to share a course

On systeme.io you can easily share a course with another user. This feature allows you to send a copy of your course so the other person can import it into their own account.

Here is how to do it step by step.

1. Open the course you want to share

Log in to your systeme.io account. Go to **Assets** → **Courses** and open the course you want to share.

2. Click on Share

Click the three dots (...) next to the course name. In the menu that appears, select **Share**.

A popup window will open displaying a unique shareable URL for that course.

3. Copy the link and send it

Click **Copy link to clipboard**.

You can now send this link to the other systeme.io user (by email, message, etc.).

When the recipient opens the link while logged into their own systeme.io account, they will be able to import a complete copy of your course.

Important points

- Sharing creates a **copy** of the course. Your original course stays intact.
- You do not need to give access to your account.
- The other user will have full control over the imported course (they can edit it, sell it, etc.).

This feature is very useful when you collaborate with other creators, agencies, or team members who also use systeme.io.

If you haven't created your course yet, start here: [How to create a course using systeme.io](#).

Conclusion

Sharing a course on systeme.io is simple and secure. In just a few clicks you can generate a link and let another user import a full copy of your course into their account.

Use this feature whenever you need to collaborate or transfer a course quickly.
