

How to view access dates for a drip content course

When you give a student **Drip Content** access on systeme.io, lectures unlock progressively according to the delays you set. Sometimes you need to know exactly when each lecture will become available for a specific student.

Here is how to view the full access schedule for any student on drip content.

1. Go to the Students list

Log in to your systeme.io account.

Navigate to **Assets** → **Courses**.

Click on the **Students** tab to see the full list of enrolled students.

2. Open the student profile

Find the student who has drip content access to the course you want to check.

Click on their **email address** to open their complete profile.

3. Show lectures access dates

On the student profile page, locate the course that has drip access.

Click the three dots (...) next to that course enrollment and select **Show lectures access dates**.

A popup will appear with a detailed list of all lectures, their modules, and the exact date and time each one becomes available for this specific student.

Important notes

- This option is **only available** when the student has **Drip Content** access. It does not appear for Full access or Partial access.
- The dates and times automatically follow the format and timezone set in your main account settings.
- The schedule is calculated based on the enrollment date + the delays you configured for each lecture.

This feature is extremely useful for support, coaching, or when a student asks “When will the next lesson unlock?”.

You can also combine it with the drip email notifications (see [How to set up email notifications for when a lecture in a drip access course becomes available](#)) so students are automatically informed when new content unlocks.

For a full explanation of the different access types, read [How are the different course access types different?](#).

Conclusion

Viewing the access dates for a drip content course on [systeme.io](#) is simple and very practical. In just a few clicks you can see the complete unlock schedule for any student.

Use this feature whenever you need to check progress, answer student questions, or verify that the drip delays are working as expected.

It gives you full transparency over how your drip content is delivered on [systeme.io](#).
